Discover the SUNCUBE Philosophy

Design

Minimalism, elegance, natural materials.

Regeneration

Heat, cold, movement – balance for body and mind.

Quality

Precision, durability, modern technology.

Nature

Harmony with surroundings and peace of life.

Choose your elements.

SUNCUBE – Luxury Saunas
Minimalist design. Maximum regeneration.

ICECUBE – Cold Plunge
Raw energy. Mental clarity.

Build your experience.

HOTCUBE – Premium Spa
Hydrotherapy for deep recovery.

GYMCUBE – Outdoor Fitness
Train naturally. Move freely.

“ Your Life.
Your Health.
Your Choice. ”

A sauna is more than relaxation – it’s a ritual that restores both body and mind. Deep heat stimulates endorphin production, reduces stress, and boosts mood. Regular sessions improve sleep quality, focus, and overall well-being. Physically, the sauna relaxes muscles, supports recovery, improves circulation, and purifies the skin. Intense sweating helps flush out toxins, strengthens immunity, and promotes natural renewal. It’s a daily dose of wellness – wrapped in wood and warmth.

“Relax Deeply.
Live Fully.”

Spending time in a spa provides significant mental and physical benefits that help prevent stress and improve overall well-being. The warm, soothing environment encourages the production of endorphins – known as the “happiness hormones” – which help reduce anxiety and ease symptoms of depression. Spa relaxation can also alleviate headaches, improve sleep quality, and may even enhance memory function.

“ Your Body.
Your Limits.
Your Mastery. ”

Spending time in a spa provides significant mental and physical benefits that help prevent stress and improve overall well-being. The warm, soothing environment encourages the production of endorphins—known as the “happiness hormones”—which help reduce anxiety and ease symptoms of depression. Spa relaxation can also alleviate headaches, improve sleep quality, and may even enhance memory function.

“ Step Into The Coldive. Step Into You Power. ”

It lowers cortisol levels, reduces stress, and triggers a surge of endorphins that lift your mood. Like a natural antidepressant, it sharpens focus, enhances mental clarity, and builds inner resilience. It's more than a ritual for the body — it's training for the mind. Each plunge builds discipline, courage, and a deep sense of self-control. IceCube is a moment of breakthrough and renewal — for those who know that true comfort begins beyond the edge of discomfort.

Luxury is not in things.
It's in how they make you feel.

SUNCUBE

SUNCUBE

SUNCUBE S

The S sauna is an intimate wellness retreat for two. Crafted from premium Thermory Aspen on the inside and durable Thermory Pine outside, it offers a clean, smooth finish and long-lasting beauty. The compact frame hides powerful performance – dry heat deeply relaxes the body, flushes out toxins, and enhances mental clarity. Its double-glazed panoramic window opens the space to nature, while stainless steel details ensure modern durability. S is not just a sauna – it's daily regeneration, elegantly refined.

SUNCUBE S

Flawless Finish. Luxury Captured in Every Detail.

The interior of Suncube is made from hand-selected, sustainably sourced Thermory wood, chosen for its natural heat retention and superior aesthetics. The wood is smooth, durable, and resistant to warping, ensuring that your sauna remains in pristine condition for years. The organic aroma of the wood enhances the sauna experience, creating a soothing and immersive atmosphere. With its natural beauty and high thermal efficiency, the wood inside Suncube offers a truly authentic and luxurious sauna experience.

SUNCUBE M

The M sauna is a spacious, elegant space designed for shared relaxation. The interior, finished with smooth Thermory Aspen, radiates natural warmth and lightness, while the durable Thermory Pine exterior gives it a solid, timeless character. A large panoramic window visually opens the space and seamlessly connects the interior with the surrounding nature. The entrance through tempered glass doors adds lightness and invites you in. Subtle stainless steel details complete the modern, minimalist design.

SUNCUBE M

Suncube is crafted using only the highest-quality materials to ensure durability, efficiency, and a luxurious feel. The sauna structure is made from Thermory wood, a thermally treated material renowned for its exceptional durability, weather resistance, and beautiful aesthetic. Reinforced stainless steel components add strength and longevity, preventing corrosion even in the toughest climates. The panoramic triple-layer heat-resistant toughened glass ensures energy efficiency while providing an immersive outdoor view. Every element of Suncube is selected for long-lasting quality and an uncompromising sauna experience.

Premium materials for ultimate performance. Breathtaking views, immersive relaxation.

SUNCUBE L

The L sauna is a spacious, impressive design that combines comfort, aesthetics, and functionality. The interior, finished with smooth Thermory Aspen, exudes natural elegance, while the Thermory Pine exterior brings a warm, timeless feel. A large panoramic window visually opens the sauna to its surroundings, filling it with light and a sense of space. The additional vestibule with its own entrance through tempered glass doors creates a comfortable transition area – perfect for leaving clothes and preparing for your sauna session. Subtle stainless steel details complete the modern, minimalist design.

SUNCUBE L

More space, more comfort. SunCube L is designed for those who appreciate freedom of movement and relaxation with more room to enjoy. Crafted from the highest quality Thermory wood – bright and elegant inside, solid and durable outside. The spacious interior and practical vestibule provide comfort and privacy during every session. Natural materials, perfect craftsmanship, and modern design come together to create a unique space for regeneration.

Only natural, carefully selected materials – smooth to the touch, durable, and resistant to changing weather conditions.

Rigid Construction Frame Certified
KVH / BSH Wood

Externally, we used Thermory ventilated 20mm thick Thermo Pine. Inside, there is Thermory Thermo Aspen with a uniform color, adapted to high temperatures and humidity. This ensures that the wood color will not change even after many years of sauna use.

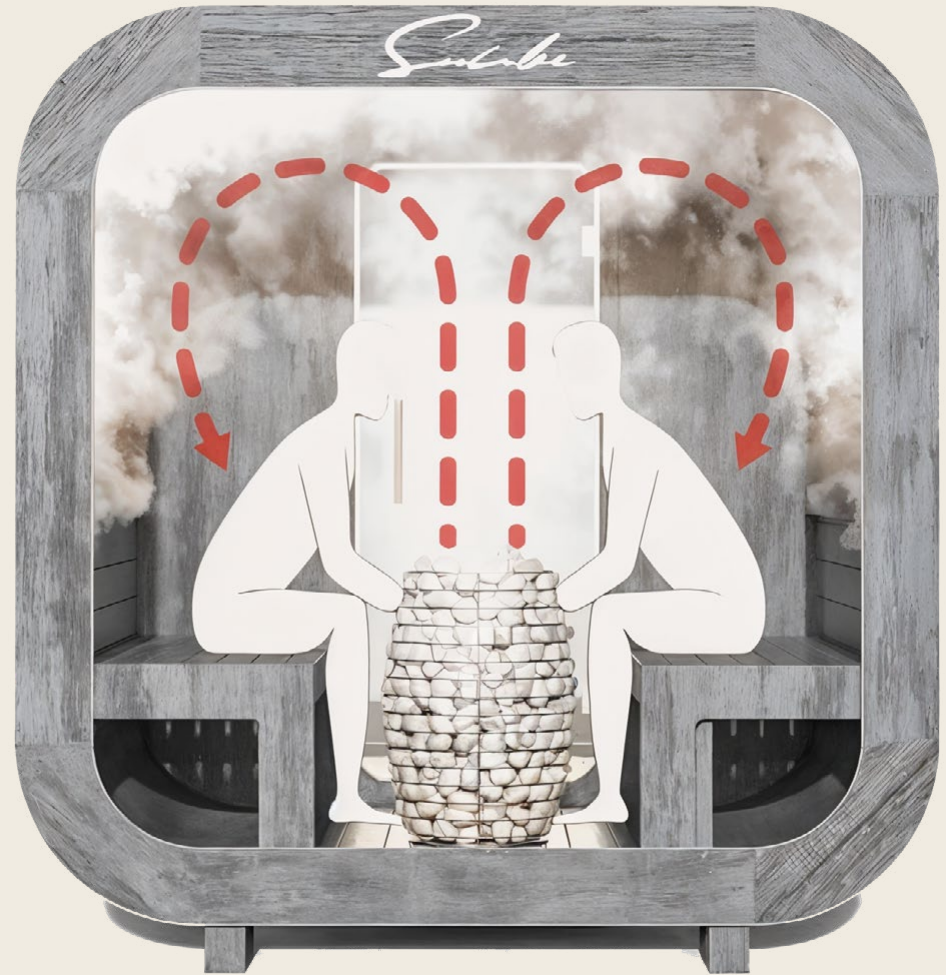

Advantages of Thermory wood.

Patented Design

The shape of the **SUNCUBE** sauna, protected by a patent across Europe; EUIPO patent number: **009149214-0001**, stands out in the market thanks to its innovative design that combines aesthetics with functionality. Its unique form not only catches the eye but also ensures even distribution of heat throughout the sauna's interior. Thanks to this exceptional construction, heat is effectively distributed, allowing for faster achievement of optimal temperature and maintaining it at the right level throughout usage.

SUNCUBE

Let's meet

Joanna Woźniczko, Finance and Accounting Specialist

I take care of finances, keep an eye on the accounts, and make sure our money doesn't run off on vacation.

Mariusz Woźniczko, Production Supervisor

There's no room for shortcuts here — everything has to shine, and I make sure of it.

Oliwier Woźniczko, Logistics

Before you even ask 'where is it?', I've already sent it there.

Ewelina Bury, Marketing and Graphic Specialist

My strategy? Make it so good-looking that even my mom would be proud.

Wiktor Pyrzyk, Sales Specialist

I sell the way I'd like to buy – with a smile and no nonsense.
